## **A Scientific Examination of the Orthodox Church Calendar, or the Old Calendar and Science**

Hieromonk Cassian, Archbishop Chrysostomos of Etna, Hieromonk Gregory

In this comprehensive study of the calendar issue, Father Cassian refutes the “received view” that the Gregorian Calendar is more precise astronomically than the Julian Calendar, proving with an abundance of scientific evidence that it is impossible, given what we know about time and space, to devise any calendar that would be entirely accurate. From a theological viewpoint, he shows that the “Revised Julian” Calendar introduced by the ecumenists of the Phanar is a veritable Trojan horse in the citadel of Orthodoxy, which has caused untold damage to the liturgical life of the Church. This is by far the most detailed survey of the calendar question ever to have appeared in English and is profusely illustrated.
