Groups - St Andrews 1981 (London Mathematical Society Lecture Note Series)

Groups - St Andrews 1981 (London Mathematical Society Lecture Note Series)

This book contains selected papers from the international conference 'Groups - St Andrews 1981', which was held at the University of St Andrews in July/August 1981. Its contents reflect the main topics of the conference: combinatorial group theory; infinite groups; general groups, finite or infinite; computational group theory. Four courses, each providing a five-lecture survey, given by J. Neubuser (Aachen), D. J. S. Robinson (Illinois), S. J. Tobin (Galway) and J. Wiengold (Cardiff), have been expanded into articles, forming the first part of the book. The second part consists of surveys and research articles written by other conference participants. More than two-thirds of the book is composed of survey articles providing a remarkably clear and up-to-date picture of those areas of group theory. The articles which comprise this book, together with their extensive bibliographies, will prove an invaluable tool to researchers in group theory, and, in addition, their detailed expositions make them very suitable for relevant postgraduate courses.

From reader reviews:

Sharon Stennis:

What do you think of book? It is just for students because they're still students or this for all people in the world, what the best subject for that? Simply you can be answered for that problem above. Every person has several personality and hobby per other. Don't to be pushed someone or something that they don't need do that. You must know how great and important the book Groups - St Andrews 1981 (London Mathematical Society Lecture Note Series). All type of book is it possible to see on many solutions. You can look for the internet methods or other social media.

Jeffrey Bumgardner:

The experience that you get from Groups - St Andrews 1981 (London Mathematical Society Lecture Note Series) is a more deep you excavating the information that hide inside words the more you get interested in reading it. It doesn't mean that this book is hard to be aware of but Groups - St Andrews 1981 (London Mathematical Society Lecture Note Series) giving you joy feeling of reading. The writer conveys their point in specific way that can be understood simply by anyone who read the item because the author of this book is well-known enough. That book also makes your vocabulary increase well. It is therefore easy to understand then can go to you, both in printed or e-book style are available. We advise you for having this kind of Groups - St Andrews 1981 (London Mathematical Society Lecture Note Series) instantly.

Shelia Tonn:

The book untitled Groups - St Andrews 1981 (London Mathematical Society Lecture Note Series) contain a lot of information on this. The writer explains the woman idea with easy means. The language is very clear to see all the people, so do certainly not worry, you can easy to read it. The book was written by famous author. The author brings you in the new era of literary works. You can read this book because you can continue reading your smart phone, or program, so you can read the book within anywhere and anytime. If you want to buy the e-book, you can open their official web-site as well as order it. Have a nice learn.

Larhonda Kennedy:

Don't be worry if you are afraid that this book will filled the space in your house, you can have it in e-book approach, more simple and reachable. This Groups - St Andrews 1981 (London Mathematical Society Lecture Note Series) can give you a lot of pals because by you checking out this one book you have issue that they don't and make an individual more like an interesting person. This book can be one of one step for you to get success. This guide offer you information that perhaps your friend doesn't realize, by knowing more than various other make you to be great individuals. So , why hesitate? Let's have Groups - St Andrews 1981 (London Mathematical Society Lecture Note Series).
