Multi-Agent Visual-SLAM Algorithms on Autonomous Robots: Multi-Robot Mapping Nezih Ergin Özkucur

The Simultaneous Localization and Mapping (SLAM) problem is one of the most challenging problems in robot navigation. The problem addresses autonomously exploring and mapping an unknown environment without prior knowledge (of features). The robot should generate the map of the environment and estimate its pose with respect to the map. An extension of this problem to the distributed multi-robot platform is a popular research topic for its challenges and commitments. Multiple cooperative robots exploring an area would decrease exploration time and increase the accuracy. This work introduces the application of two successful SLAM solution techniques to the multi-robot domain using visual sensors and non-unique landmarks. There are two contributions to the literature: Evolutionary Strategies (ES) is used to calibrate the parameters of the Extended Kalman Filter-SLAM (EKF-SLAM) method with supervised data, and a novel map merging method with uncertainty propagation is introduced for the Fast-SLAM algorithm. The developed algorithms are tested in both simulated and real robot experiments and the improvements and applicability of the developed methods are shown with the results.

From reader reviews:

Rebecca Morales:

Book is definitely written, printed, or created for everything. You can understand everything you want by a book. Book has a different type. We all know that that book is important factor to bring us around the world. Next to that you can your reading expertise was fluently. A e-book Multi-Agent Visual-SLAM Algorithms on Autonomous Robots: Multi-Robot Mapping will make you to possibly be smarter. You can feel a lot more confidence if you can know about everything. But some of you think that open or reading a book make you bored. It is far from make you fun. Why they can be thought like that? Have you in search of best book or appropriate book with you?

Nancy Jackson:

Do you have something that you prefer such as book? The publication lovers usually prefer to pick book like comic, short story and the biggest some may be novel. Now, why not hoping Multi-Agent Visual-SLAM Algorithms on Autonomous Robots: Multi-Robot Mapping that give your entertainment preference will be satisfied simply by reading this book. Reading habit all over the world can be said as the method for people to know world a great deal better then how they react towards the world. It can't be stated constantly that reading routine only for the geeky person but for all of you who wants to end up being success person. So , for every you who want to start looking at as your good habit, it is possible to pick Multi-Agent Visual-SLAM Algorithms on Autonomous Robots: Multi-Robot Mapping become your own starter.

Deborah Anderson:

Reading a book to get new life style in this season; every people loves to examine a book. When you learn a book you can get a wide range of benefit. When you read ebooks, you can improve your knowledge, due to the fact book has a lot of information onto it. The information that you will get depend on what forms of book that you have read. If you need to get information about your examine, you can read education books, but if you want to entertain yourself read a fiction books, such us novel, comics, and also soon. The Multi-Agent Visual-SLAM Algorithms on Autonomous Robots: Multi-Robot Mapping provide you with a new experience in looking at a book.

Bryce Adams:

Many people spending their moment by playing outside having friends, fun activity with family or just watching TV all day long. You can have new activity to shell out your whole day by looking at a book. Ugh, do you consider reading a book can actually hard because you have to take the book everywhere? It ok you can have the e-book, getting everywhere you want in your Smartphone. Like Multi-Agent Visual-SLAM Algorithms on Autonomous Robots: Multi-Robot Mapping which is finding the e-book version. So , why not try out this book? Let's see.
