Seismic Isolation for Architects

Andrew Charleson, Adriana Guisasola

Seismic Isolation for Architects Andrew Charleson, Adriana Guisasola

Seismic isolation offers the highest degree of earthquake protection to buildings and their inhabitants. Modern applications of the technology are less than 50 years old and uptake in seismically active regions continues to soar.

Seismic Isolation for Architects is a comprehensive introduction to the theory and practice in this field. Based on the latest research findings and the authors' extensive experience, coverage includes the application, effectiveness, benefits, and limitations of seismic isolation, as well as the architectural form, design aspects, retrofitting, economics, construction, and maintenance related to this method.

The book is written for an international audience: the authors review codes and practices from a number of countries and draw on examples from eleven territories including the US, Chile, Argentina, Italy, Japan, and New Zealand. Aimed at readers without prior knowledge of structural engineering, the book provides an accessible, non-technical approach without using equations or calculations, instead using over 200 drawings, diagrams and images to support the text. This book is key reading for students on architecture and civil engineering courses looking for a clear introduction to seismic-resistant design, as well as architects and engineers working in seismically active regions.

From reader reviews:

Lucinda Smith:

As people who live in the particular modest era should be update about what going on or info even knowledge to make all of them keep up with the era which can be always change and move forward. Some of you maybe may update themselves by reading books. It is a good choice for you personally but the problems coming to you actually is you don't know what kind you should start with. This Seismic Isolation for Architects is our recommendation so you keep up with the world. Why, because book serves what you want and need in this era.

Patricia Rodrigue:

Nowadays reading books are more than want or need but also be a life style. This reading routine give you lot of advantages. Associate programs you got of course the knowledge the particular information inside the book in which improve your knowledge and information. The information you get based on what kind of book you read, if you want have more knowledge just go with training books but if you want feel happy read one using theme for entertaining like comic or novel. The Seismic Isolation for Architects is kind of guide which is giving the reader erratic experience.

Anna Thompson:

Reading a book tends to be new life style in this era globalization. With examining you can get a lot of information that could give you benefit in your life. Using book everyone in this world could share their idea. Textbooks can also inspire a lot of people. A lot of author can inspire their reader with their story as well as their experience. Not only the storyline that share in the publications. But also they write about the data about something that you need case in point. How to get the good score toefl, or how to teach your children, there are many kinds of book that exist now. The authors in this world always try to improve their proficiency in writing, they also doing some exploration before they write to their book. One of them is this Seismic Isolation for Architects.

Donald Barber:

Are you kind of active person, only have 10 or perhaps 15 minute in your morning to upgrading your mind expertise or thinking skill possibly analytical thinking? Then you have problem with the book in comparison with can satisfy your short time to read it because all of this time you only find publication that need more time to be read. Seismic Isolation for Architects can be your answer because it can be read by anyone who have those short spare time problems.
