Introduction to Compiler Construction in a Java World Bill Campbell, Swami Iyer, Bahar Akbal-Delibas

Immersing students in Java and the Java Virtual Machine (JVM), **Introduction to Compiler Construction in a Java World** enables a deep understanding of the Java programming language and its implementation. The text focuses on design, organization, and testing, helping students learn good software engineering skills and become better programmers.

The book covers all of the standard compiler topics, including lexical analysis, parsing, abstract syntax trees, semantic analysis, code generation, and register allocation. The authors also demonstrate how JVM code can be translated to a register machine, specifically the MIPS architecture. In addition, they discuss recent strategies, such as just-in-time compiling and hotspot compiling, and present an overview of leading commercial compilers. Each chapter includes a mix of written exercises and programming projects.

By working with and extending a real, functional compiler, students develop a hands-on appreciation of how compilers work, how to write compilers, and how the Java language behaves. They also get invaluable practice working with a non-trivial Java program of more than 30,000 lines of code. Fully documented Java code for the compiler is accessible at http://www.cs.umb.edu/j--/

From reader reviews:

Colby McCray:

The book untitled Introduction to Compiler Construction in a Java World is the guide that recommended to you you just read. You can see the quality of the publication content that will be shown to an individual. The language that writer use to explained their way of doing something is easily to understand. The article writer was did a lot of investigation when write the book, to ensure the information that they share to your account is absolutely accurate. You also could get the e-book of Introduction to Compiler Construction in a Java World from the publisher to make you considerably more enjoy free time.

Melissa Sanders:

Your reading sixth sense will not betray an individual, why because this Introduction to Compiler Construction in a Java World guide written by well-known writer who really knows well how to make book which might be understand by anyone who have read the book. Written within good manner for you, dripping every ideas and publishing skill only for eliminate your personal hunger then you still doubt Introduction to Compiler Construction in a Java World as good book not merely by the cover but also by the content. This is one e-book that can break don't assess book by its handle, so do you still needing one more sixth sense to pick this kind of!? Oh come on your reading sixth sense already said so why you have to listening to another sixth sense.

Raymond Albanese:

In this era globalization it is important to someone to find information. The information will make you to definitely understand the condition of the world. The fitness of the world makes the information quicker to share. You can find a lot of referrals to get information example: internet, newspaper, book, and soon. You can see that now, a lot of publisher this print many kinds of book. Typically the book that recommended to your account is Introduction to Compiler Construction in a Java World this e-book consist a lot of the information from the condition of this world now. This specific book was represented so why is the world has grown up. The words styles that writer use to explain it is easy to understand. The particular writer made some study when he makes this book. This is why this book appropriate all of you.

Lavada Rowlett:

Don't be worry when you are afraid that this book can filled the space in your house, you may have it in e-book technique, more simple and reachable. That Introduction to Compiler Construction in a Java World can give you a lot of close friends because by you checking out this one book you have point that they don't and make you actually more like an interesting person. This particular book can be one of one step for you to get success. This reserve offer you information that might be your friend doesn't learn, by knowing more than various other make you to be great men and women. So , why hesitate? Let us have Introduction to Compiler Construction in a Java World.
