Physicians' Guide to Nutraceuticals Second Edition

Douglas L. Ringer

Physicians' Guide to Nutraceuticals Second Edition Douglas L. Ringer

We created the Physicians' Guide to Nutraceuticals to fill a void that was left where advertising hyperbole leaves off and the need for more detailed information begins. The companies that are making quality products need to be presented in a professional format, in one central reference, so you can compare the companies and products for yourself.

The PGN has been designed first and foremost as an educational tool that provides you with the detailed information you need to make an informed choice regarding companies that manufacture health products.

We provide you with company and product information, product-specific clinical studies, definitions to health-related terminology, indexes that help you find the products that fit your particular needs and an education section written by well-respected members of the Natural Products Industry. Our format is free of conventional advertising, logos and catch phrases that inevitably get in the way of the facts. We feel that consumers and healthcare professionals deserve more information than what can be presented on a product label or in a magazine advertisement.

We have created a book that you can use to choose natural products wisely.
