Richard J. Haier

The Neuroscience of Intelligence (Cambridge Fundamentals of Neuroscience in Psychology) Richard J. Haier

This book introduces new and provocative neuroscience research that advances our understanding of intelligence and the brain. Compelling evidence shows that genetics plays a more important role than environment as intelligence develops from childhood, and that intelligence test scores correspond strongly to specific features of the brain assessed with neuroimaging. In understandable language, Richard J. Haier explains cutting-edge techniques based on genetics, DNA, and imaging of brain connectivity and function. He dispels common misconceptions, such as the belief that IQ tests are biased or meaningless, and debunks simple interventions alleged to increase intelligence. Readers will learn about the real possibility of dramatically enhancing intelligence based on neuroscience findings and the positive implications this could have for education and social policy. The text also explores potential controversies surrounding neuro-poverty, neuro-socioeconomic status, and the morality of enhancing intelligence for everyone. Online resources, including additional visuals, animations, questions and links, reinforce the material.

Albert Christensen:

Many people spending their time frame by playing outside using friends, fun activity together with family or just watching TV the whole day. You can have new activity to spend your whole day by examining a book. Ugh, you think reading a book can actually hard because you have to bring the book everywhere? It ok you can have the e-book, delivering everywhere you want in your Touch screen phone. Like The Neuroscience of Intelligence (Cambridge Fundamentals of Neuroscience in Psychology) which is getting the e-book version. So , try out this book? Let's view.

Vivian Regan:

As a student exactly feel bored in order to reading. If their teacher requested them to go to the library or even make summary for some book, they are complained. Just little students that has reading's internal or real their hobby. They just do what the educator want, like asked to go to the library. They go to presently there but nothing reading really. Any students feel that reading is not important, boring and also can't see colorful photographs on there. Yeah, it is to get complicated. Book is very important in your case. As we know that on this era, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country.

Therefore , this The Neuroscience of Intelligence (Cambridge Fundamentals of Neuroscience in Psychology) can make you sense more interested to read.
