Evolutionary Biology of the New World Monkeys and Continental Drift (Biological Regulation and Development)

Evolutionary Biology of the New World Monkeys and Continental Drift (Biological Regulation and Development)

It is now well known that the concept of drifting continents became an established theory during the 1960s. Not long after this "revolution in the earth sciences," researchers began applying the continental drift model to problems in historical biogeography. One such problem was the origin and dispersal of the New World monkeys, the Platyrrhini. Our interests in this subject began in the late 1960s on different continents quite independent of one another in the cities of Florence, Italy, and Berkeley, California. In Florence in 1968, A. B. Chiarelli, through stimulating discussions with R. von Koenigswald and B. de Boer, became intrigued with the possibility that a repositioning of the continents of Africa and South America in the early Cenozoic might alter previous traditional conceptions of a North American origin of the Platyrrhini. During the early 1970s this concept was expanded and pursued by him through discussions with students while serving as visiting professor at the University of Toronto. By this time, publication of the Journal of Human Evolution was well underway, and Dr. Chiarelli as editor encouraged a dialogue emphasizing continental drift models of primate origins which culminated in a series of articles published in that journal during 1974-75. In early 1970, while attending the University of California at Berkeley, R. L. Ciochon was introduced to the concept of continental drift and plate tectonics and their concomitant applications to vertebrate evolution through talks with paleontologist W. A. Clemens and anthropologist S. L. Washburn.

From reader reviews:

Candice Delgado:

Book is usually written, printed, or outlined for everything. You can realize everything you want by a e-book. Book has a different type. As you may know that book is important matter to bring us around the world. Alongside that you can your reading expertise was fluently. A reserve Evolutionary Biology of the New World Monkeys and Continental Drift (Biological Regulation and Development) will make you to end up being smarter. You can feel much more confidence if you can know about every little thing. But some of you think in which open or reading the book make you bored. It is not necessarily make you fun. Why they may be thought like that? Have you in search of best book or ideal book with you?

Anthony Pippin:

The reason? Because this Evolutionary Biology of the New World Monkeys and Continental Drift (Biological Regulation and Development) is an unordinary book that the inside of the reserve waiting for you to snap that but latter it will zap you with the secret the idea inside. Reading this book next to it was fantastic author who also write the book in such amazing way makes the content interior easier to understand, entertaining method but still convey the meaning totally. So , it is good for you for not hesitating having this nowadays or you going to regret it. This phenomenal book will give you a lot of gains than the other book possess such as help improving your skill and your critical thinking approach. So , still want to delay having that book? If I ended up you I will go to the guide store hurriedly.

Martina Joseph:

A lot of book has printed but it is different. You can get it by world wide web on social media. You can choose the most beneficial book for you, science, comedian, novel, or whatever by means of searching from it. It is identified as of book Evolutionary Biology of the New World Monkeys and Continental Drift (Biological Regulation and Development). You can contribute your knowledge by it. Without making the printed book, it could possibly add your knowledge and make anyone happier to read. It is most important that, you must aware about reserve. It can bring you from one place to other place.

Carla McFarlin:

Reading a e-book make you to get more knowledge from it. You can take knowledge and information from the book. Book is created or printed or illustrated from each source that will filled update of news. In this modern era like today, many ways to get information are available for you. From media social including newspaper, magazines, science book, encyclopedia, reference book, story and comic. You can add your understanding by that book. Isn't it time to spend your spare time to open your book? Or just searching for the Evolutionary Biology of the New World Monkeys and Continental Drift (Biological Regulation and Development) when you required it?
