Haematology: An Illustrated Colour Text Martin R. Howard, Peter J Hamilton

This textbook on haematology in the Illustrated Colour Text series is suitable for medical students, junior doctors and others needing a concise and practical introduction to the subject.

- Concise and manageable coverage of the major blood diseases and their treatment.
- Does not overload the reader with science, unlike some competing books.
- Focus is on the haematology patient and on the practical aspects of the subject.
- Makes use of the attractive features of the ICT series - double page spreads, lots of colour illustrations, summary boxes.
- Updating to take account of recent developments in stem cell biology.
- Increased emphasis on genomic and proteomic techniques in the diagnosis of haematological malignancy.
- Use of new imaging techniques including MRI and PET.
- Description of advances in treatment of leukaemia and lymphoma and in diagnosis and management of patients with thrombophilia and venous thrombosis.
- Development of new antimicrobial agents in management of immunosuppressed patients with infection.
- New double page spread on palliative care of patients with blood disorders.
- New illustrations.
