Study of feasibility of image-based localization

Meyer Reda

Study of feasibility of image-based localization Meyer Reda
This book is on localization with visualization. He speak about how visualization is needed on a robot to get his localization with. For better result, a precise calibration is needed. It's a better way to calculate the localization with a fix camera on the robot than out of the robot, it's simplifying the measurement process. I advice this book to all engineers which are looking for a first step into localization with visualization.
