Sunstone/Piedra De Sol Octavio Paz

Nobel laureate Octavio Paz's premier long poem *Sunstone/Piedra de Sol* is here presented as a separate volume, with beautiful illustrations from an eighteenth-century treatise on the Mexican calendar.

Presented in Eliot Weinberger's excellent new translation with the Spanish texts *en face*, this is the 1957 poem "that definitively established Paz as a major international figure" (*Sagetrieb*). Written as a single cyclical sentence (at the end of the poem the first six lines are written again), *Sunstone* is a tour de force of momentum. It takes as its structural basis the circular Aztec calendar, which measured the synodic period of the planet Venus (584 days?the number of lines of *Sunstone*). But, as *The New Republic* noted, "this esoteric correlative design...does not circumscribe its subject. [It is] a lyrically discursive exploration of time and memory, of erotic love, or art and writing." Black-and-white illustrations
