Process-Driven Applications with BPMN Volker Stiehl

How can we optimize differentiating business processes and exploit their full potential? Here Volker Stiehl provides answers, utilizing the various options that the BPMN (Business Process Model and Notation) standard offers for planning, implementing and monitoring processes.

The book presents an approach for implementing an architecture for applications that strives to find a balance between development and maintenance costs, sustainability, scalability and fault tolerance; that meets flexibility requirements without becoming inordinately complex itself; and that keeps the end application as abstract as possible from the system landscape in which it operates. Based on the semantic enhancements found in version 2.0 of the BPMN standard, which have made it possible to execute process models, his approach exploits BPMN to create and run complete application architectures. In this context, BPMN is not just used to model the business processes of the application, as the “B” in BPMN might suggest; but also to model and execute the integration processes between the systems. Throughout the book, the software package SAP Process Orchestration is used to illustrate the implementation of the proposed architecture, yet all recommendations are intentionally kept generic so that they can be implemented on any other comparable platform as well.

Software architects, IT managers, software developers and project managers, as well as students of information and business technology will find the book a valuable resource. The proposed application architecture offers them a detailed blueprint, the principles of which they can use to plan and implement process-driven distributed applications.

From reader reviews:

Tim Simmons:

Do you have something that you enjoy such as book? The guide lovers usually prefer to select book like comic, limited story and the biggest one is novel. Now, why not trying Process-Driven Applications with BPMN that give your satisfaction preference will be satisfied by reading this book. Reading behavior all over the world can be said as the opportunity for people to know world better then how they react towards the world. It can't be explained constantly that reading routine only for the geeky person but for all of you who wants to become success person. So , for all of you who want to start looking at as your good habit, you could pick Process-Driven Applications with BPMN become your own personal starter.

Edward Torres:

Do you one of the book lovers? If so, do you ever feeling doubt if you are in the book store? Make an effort to pick one book that you just dont know the inside because don't evaluate book by its protect may doesn't work the following is difficult job because you are afraid that the inside maybe not while fantastic as in the outside appear likes. Maybe you answer may be Process-Driven Applications with BPMN why because the amazing cover that make you consider with regards to the content will not disappoint anyone. The inside or content is fantastic as the outside or even cover. Your reading sixth sense will directly make suggestions to pick up this book.

Joshua Molina:

This Process-Driven Applications with BPMN is great reserve for you because the content which can be full of information for you who all always deal with world and get to make decision every minute. This kind of book reveal it facts accurately using great plan word or we can claim no rambling sentences inside it. So if you are read this hurriedly you can have whole info in it. Doesn't mean it only gives you straight forward sentences but tricky core information with lovely delivering sentences. Having Process-Driven Applications with BPMN in your hand like getting the world in your arm, data in it is not ridiculous one. We can say that no e-book that offer you world inside ten or fifteen small right but this reserve already do that. So , this is good reading book. Hey there Mr. and Mrs. stressful do you still doubt that?

Charles Bax:

As a pupil exactly feel bored for you to reading. If their teacher requested them to go to the library in order to make summary for some publication, they are complained. Just small students that has reading's spirit or real their leisure activity. They just do what the teacher want, like asked to the library. They go to presently there but nothing reading significantly. Any students feel that reading is not important, boring and also can't see colorful pictures on there. Yeah, it is to become complicated. Book is very important to suit your needs. As we know that on this age, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. So , this Process-Driven Applications with BPMN can make you truly feel more interested to read.
