## **Thermal Hazards of Chemical Reactions (Industrial Safety Series) Theodor Grewer**

Exothermic reactions used for the production of chemicals present a hazard if they proceed without control. Runaway reactions can result in a blow-off of the reactor top and an emission of reactants and products, possibly followed by a gas explosion. Undesired exothermic reactions initiated during production, purification or storage by excessive temperatures or other causes have similar destructive effects, even if the origin is different. Although the hazards connected with exothermic reactions have been known since the inception of the chemical industry, a systematic knowledge of the possible effects has only been developed in the last 25 years. A number of incidents in the chemical industry, which have been investigated by groups of experts from various companies, have promoted the understanding of these hazards. The author has investigated incidents in plants and tested experimental methods for more than 20 years. In particular he was interested in collecting and comparing safety-relevant data of products. At the end of his industrial career he now believes that it is important to pass on information about this field of activity to younger colleagues who are interested in the safety of chemical plants.

The purpose of this book is to provide a basis for understanding the hazards arising from exothermic reactions. Knowledge of the relevant properties is necessary for a safe processing of products and mixtures. The test methods which have been used and developed together with the increasing understanding of the hazards of reactions are particularly important. A critical survey of extensive experimental techniques is provided.

### **From reader reviews:**

#### **Eric Fincher:**

The book Thermal Hazards of Chemical Reactions (Industrial Safety Series) can give more knowledge and also the precise product information about everything you want. So just why must we leave a good thing like a book Thermal Hazards of Chemical Reactions (Industrial Safety Series)? Wide variety you have a different opinion about reserve. But one aim in which book can give many data for us. It is absolutely right. Right now, try to closer together with your book. Knowledge or info that you take for that, you may give for each other; you are able to share all of these. Book Thermal Hazards of Chemical Reactions (Industrial Safety Series) has simple shape however, you know: it has great and massive function for you. You can seem the enormous world by open and read a book. So it is very wonderful.

#### **John Stanley:**

Are you kind of stressful person, only have 10 as well as 15 minute in your day time to upgrading your mind expertise or thinking skill also analytical thinking? Then you are experiencing problem with the book compared to can satisfy your short time to read it because all this time you only find guide that need more time to be read. Thermal Hazards of Chemical Reactions (Industrial Safety Series) can be your answer as it can be read by you who have those short free time problems.

#### **Theresa Villarreal:**

The book untitled Thermal Hazards of Chemical Reactions (Industrial Safety Series) contain a lot of information on the item. The writer explains your ex idea with easy means. The language is very straightforward all the people, so do certainly not worry, you can easy to read the item. The book was written by famous author. The author will bring you in the new era of literary works. You can read this book because you can please read on your smart phone, or program, so you can read the book inside anywhere and anytime.
