Moral Values (Ethics, Vol. 2) Nicolai Hartmann

Nicolai Hartmann (1882-1950), along with Henri Bergson and Martin Heidegger, was instrumental in restoring metaphysics to the study of philosophy. Unlike his contemporaries, however, Hartmann was clearly influenced by Plato. His *tour-de-force*, *Ethik*, published in English in 1932 as *Ethics*, may be the most outstanding work on moral philosophy produced in the twentieth century.

In the first part of *Ethics (Moral Phenomena)*, Hartmann was concerned with the structure of ethical phenomena, and criticized utilitarianism, Kantianism, and relativism as misleading approaches. In the second part, *Moral Values*, the author describes all values as forming a complex and as yet imperfectly known system. The actualization of the non-moral and elementary moral values is a necessary condition for the actualization of the higher values. It is on this account that rudimentary values have a prior claim.

Hartmann outlines the main features of the chief virtues, and shows that the moral disposition required in any exigency is always a specific synthesis of various and often conflicting values. Specifically describing fundamental moral values—such as goodness, nobility, and vitality—and special moral values—such as justice, wisdom, courage, self-control, trustworthiness, and modesty—Hartmann takes theoretical philosophy and brings it very much into the realm of the practical.

A compelling and insightful volume, *Moral Values* remains an essential contribution to the moral and ethical literature of the twentieth century. Hartmann offers a self-contained system of ethics that yet offers a conservative outlook on social life.
