Philip's 101 Objects to Spot in the Night Sky: A Fun and Practical Guide to the Stars and Planets

Robin Scagell

The new Philip's 101 Objects To Spot In The Night Sky is a fun and practical guide to identifying and observing 101 of the most fascinating and exciting sights in the northern-hemisphere sky for young newcomers to astronomy, explaining what can be seen using the naked eye, binoculars or a telescope. In this book, author Robin Scagell shows the novice astronomer where to look in the sky to see a particular object, or group of objects or sights, which may be a planet, its rings or satellites, a series of lunar craters, a constellation, asteroids, meteors, a nebula, galaxy or star cluster, for example. He explains what you can expect to see with just the naked eye and describes the object in detail, giving observing tips for better viewing. A concise 'fact file' is provided for major objects, and readers can award themselves 'points' for their skill in finding the object in the first instance, with higher scores given for spotting some of its more elusive or hard-to-see features. Philip's 101 Objects To Spot In The Night Sky is illustrated in full colour throughout, with approximately 300 high-quality photographs, diagrams and star maps.

From reader reviews:

Robert Arnett:

Book is actually written, printed, or descriptive for everything. You can understand everything you want by a publication. Book has a different type. As it is known to us that book is important thing to bring us around the world. Next to that you can your reading skill was fluently. A reserve Philip's 101 Objects to Spot in the Night Sky: A Fun and Practical Guide to the Stars and Planets will make you to possibly be smarter. You can feel a lot more confidence if you can know about anything. But some of you think this open or reading a book make you bored. It is not necessarily make you fun. Why they could be thought like that? Have you looking for best book or ideal book with you?

Myrtle Galloway:

What do you in relation to book? It is not important along? Or just adding material if you want something to explain what your own problem? How about your spare time? Or are you busy particular person? If you don't have spare time to complete others business, it is make one feel bored faster. And you have time? What did you do? Everyone has many questions above. They must answer that question because just their can do that. It said that about reserve. Book is familiar in each person. Yes, it is correct. Because start from on kindergarten until university need this kind of Philip's 101 Objects to Spot in the Night Sky: A Fun and Practical Guide to the Stars and Planets to read.

Edgar Curtis:

As people who live in typically the modest era should be upgrade about what going on or details even knowledge to make them keep up with the era which is always change and make progress. Some of you maybe will probably update themselves by examining books. It is a good choice for you personally but the problems coming to you is you don't know which one you should start with. This Philip's 101 Objects to Spot in the Night Sky: A Fun and Practical Guide to the Stars and Planets is our recommendation to cause you to keep up with the world. Why, since this book serves what you want and want in this era.

Paul Horn:

Is it you who having spare time subsequently spend it whole day by simply watching television programs or just telling lies on the bed? Do you need something totally new? This Philip's 101 Objects to Spot in the Night Sky: A Fun and Practical Guide to the Stars and Planets can be the reply, oh how comes? The new book you know. You are therefore out of date, spending your spare time by reading in this brand new era is common not a nerd activity. So what these publications have than the others?
