This book is distinctive among current studies on this topic. The Chinese economy has entered a period of transformation, which has brought changes to the finance market and consumer habits. For a long time, topics such as monetary policy, reform, financial risks and so forth have been the focus. But there have been few studies of those aspects of the consumer finance market that are directly related to private consumption. Studies on this topic, to which this book contributes, are necessary for understanding the current economic situation in China.
