the origin of gravitation (nature mechanism)

Dr zheng sheng ming

the origin of gravitation (nature mechanism) Dr zheng sheng ming

In the process of mankind investigate natural rule: people know well many interactions in the nature, today all interactions in the nature are classed by four kinds of force: electromagnetic force, gravitation, weak force, and strong force. Meanwhile people use these four kinds force to explain all phenomena in the Nature. Obviously this class mainly according to their effect of acting on each other, but is not according to their mechanism of engender. Moreover people do not know their mechanism of origin until now. On the other hand, what relation between these four forces? Can unify these four forces into one force? In other word: these four kinds force is the difference showing form of one force, is not it? Is there an essence natural law which leads to the nature working? These questions have been attracting people to make great efforts to answer! For solve these questions and find their mechanism of origin, I do some experiments and discover that the moving photons produce gravitation. This discovery shows the origin of gravitation. Meanwhile I also do experiments show that light is a particle, but is not a wave-particle duality. The interference fringe of light which like wave characteristic is produced by the gravitation. In a word: my experiments show that the elementary particles moving produce gravitation and electromagnetic force, this effect also produce wave effect. Namely my experiment and calculate not only reveal the origin of gravitation, but also reveal the origin of electric charge and magnetic force. Base on this I first unify the electromagnetic force and gravitation, this meaning is my experiments and calculates show that the electromagnetic force and gravitation are all produced by one origin, their essence are same and their size are equally. From this we can know the meaning of gravitational mass which Newton and Einstein defined and the meaning of electric charge which Coulomb and Franklin defined; moreover I further reveal the essence of caloric, and reveal the mechanism of chemical reaction, demonstrate the quantum and General theory of Relativity are all wrong. Along this way, I reveal the mechanism of motion in optics, thermal, electromagnet, and gravitation. This shows the mechanism of natural motion. Namely I find the essence natural rule show the nature how to motion from atomic world to the heavenly body world, and reveal what is the elementary particle in nature, the matter how to compose. That is to say the elementary particle in the Nature is photon; the moving photons produce electromagnetic force and gravitation. This force make the photon compose together: come to being electron, proton, and so on other particles, meanwhile the photon also transmit these forces in space, from this engender chemical interaction, heat phenomenon, and other natural phenomena, in the end come to being cosmos. In this volume1: the origin of gravitation show the experiment which I discover the gravitation how produces, and also show the quantitative experiment and I get formula.

From reader reviews:

Richard Poston:

The book the origin of gravitation (nature mechanism) can give more knowledge and also the precise product information about everything you want. So just why must we leave a good thing like a book the origin of gravitation (nature mechanism)? Some of you have a different opinion about reserve. But one aim that book can give many data for us. It is absolutely right. Right now, try to closer with the book. Knowledge or info that you take for that, you may give for each other; you can share all of these. Book the origin of gravitation (nature mechanism) has simple shape nevertheless, you know: it has great and big function for you. You can look the enormous world by open up and read a book. So it is very wonderful.

Lloyd Schuler:

As people who live in the actual modest era should be up-date about what going on or details even knowledge to make these people keep up with the era which is always change and move forward. Some of you maybe will update themselves by reading through books. It is a good choice in your case but the problems coming to you is you don't know which you should start with. This the origin of gravitation (nature mechanism) is our recommendation so you keep up with the world. Why, because book serves what you want and need in this era.

Alexandra Robbins:

Many people spending their time by playing outside using friends, fun activity along with family or just watching TV the entire day. You can have new activity to invest your whole day by studying a book. Ugh, think reading a book really can hard because you have to accept the book everywhere? It all right you can have the e-book, having everywhere you want in your Mobile phone. Like the origin of gravitation (nature mechanism) which is having the e-book version. So , try out this book? Let's notice.

Richard Graham:

Publication is one of source of understanding. We can add our knowledge from it. Not only for students and also native or citizen need book to know the upgrade information of year for you to year. As we know those publications have many advantages. Beside all of us add our knowledge, can also bring us to around the world. By the book the origin of gravitation (nature mechanism) we can get more advantage. Don't you to definitely be creative people? For being creative person must want to read a book. Merely choose the best book that suitable with your aim. Don't always be doubt to change your life by this book the origin of gravitation (nature mechanism). You can more pleasing than now.
