Building Web Solutions with ASP.Net and ADO.NET (Developer Reference) Dino Esposito

Most Web applications follow a simple "3F" pattern: fetch, format, and forward to the browser. With this in-depth guide, you'll take your ASP.NET and ADO.NET skills to the next level and learn key techniques to develop more complex Web applications. Discover how to build applications for ad-hoc and effective Web reporting, applications that work disconnected from the data source and use XML to communicate with non-.NET systems, and general-purpose applications that take advantage of the data abstraction of ADO.NET. Along the way, you'll learn how to take advantage of code reusability, user controls, code-behind, custom Web controls, and other time-saving techniques employed by ASP.NET experts.

Topics covered include:

- Data-bound .NET controls
- Templated and editable data grids
- Code reusability in .NET
- Advanced reporting
- Disconnected applications
- Interoperable applications
- XML Web services
- .NET Managed Providers

CD-ROM FEATURES:

- A fully searchable electronic copy of the book
- Sample code written in Microsoft® Visual C#™ .NET and Visual Basic® .NET

A Note Regarding the CD or DVD

The print version of this book ships with a CD or DVD. For those customers purchasing one of the digital formats in which this book is available, we are pleased to offer the CD/DVD content as a free download via O'Reilly Media's Digital Distribution services. To download this content, please visit O'Reilly's web site, search for the title of this book to find its catalog page, and click on the link below the cover image (Examples, Companion Content, or Practice Files). Note that while we provide as much of the media content as we are able via free download, we are sometimes limited by licensing restrictions. Please direct any questions or concerns to booktech@oreilly.com.
