Computer Integrated Manufacturing: Current Status and Challenges (Nato Asi Series, Series F : Computer and Systems Sciences, Vol 49) I. Burhan Turksen, Kiyoji Asai

The Current state of expectations is that Computer Integrated Manufacturing (CIM) will ultimately determine the industrial growth of world nations within the next few decades. Computer Aided Design (CAD), Computer Aided Manufacturing (CAM), Flexible Manufacturing Systems (FMS), Robotics together with Knowledge and Information Based Systems (KIBS) and Communication Networks are expected to develop to a mature state to respond effectively to the managerial requirements of the factories of the future that are becoming highly integrated and complex. CIM represents a new production approach which will allow the factories to deliver a high variety of products at a low cost and with short production cycles. The new technologies for CIM are needed to develop manufacturing environments that are smarter, faster, coupled, integrated, optimized, and flexible. Sophistication and a high degree of specialization in materials science, artificial intelligence, communications technology and knowledge-information science techniques are needed among others for the development of realizable and workable CIM systems that are capable of adjusting to volatile markets. CIM factories are to allow the production of a wide variety of similar products in small batches through standard but multi mission oriented designs that accommodate flexibility with specialized software.

From reader reviews:

George Cardenas:

Throughout other case, little persons like to read book Computer Integrated Manufacturing: Current Status and Challenges (Nato Asi Series, Series F : Computer and Systems Sciences, Vol 49). You can choose the best book if you appreciate reading a book. So long as we know about how is important the book Computer Integrated Manufacturing: Current Status and Challenges (Nato Asi Series, Series F : Computer and Systems Sciences, Vol 49). You can add understanding and of course you can around the world by a book. Absolutely right, since from book you can know everything! From your country right up until foreign or abroad you may be known. About simple point until wonderful thing you could know that. In this era, we can easily open a book or even searching by internet gadget. It is called e-book. You can utilize it when you feel uninterested to go to the library. Let's read.

Houston Boynton:

Book is usually written, printed, or descriptive for everything. You can know everything you want by a guide. Book has a different type. As you may know that book is important thing to bring us around the world. Adjacent to that you can your reading skill was fluently. A e-book Computer Integrated Manufacturing: Current Status and Challenges (Nato Asi Series, Series F : Computer and Systems Sciences, Vol 49) will make you to be smarter. You can feel much more confidence if you can know about almost everything. But some of you think in which open or reading a new book make you bored. It is not necessarily make you fun. Why they may be thought like that? Have you trying to find best book or appropriate book with you?

George Bash:

The publication untitled Computer Integrated Manufacturing: Current Status and Challenges (Nato Asi Series, Series F : Computer and Systems Sciences, Vol 49) is the guide that recommended to you to see. You can see the quality of the guide content that will be shown to you actually. The language that author use to explained their ideas are easily to understand. The writer was did a lot of analysis when write the book, to ensure the information that they share for you is absolutely accurate. You also will get the e-book of Computer Integrated Manufacturing: Current Status and Challenges (Nato Asi Series, Series F : Computer and Systems Sciences, Vol 49) from the publisher to make you a lot more enjoy free time.

Clare Andrews:

Computer Integrated Manufacturing: Current Status and Challenges (Nato Asi Series, Series F : Computer and Systems Sciences, Vol 49) can be one of your nice books that are good idea. Many of us recommend that straight away because this reserve has good vocabulary that will increase your knowledge in terminology, easy to understand, bit entertaining but delivering the information. The article writer giving his/her effort to

place every word into delight arrangement in writing Computer Integrated Manufacturing: Current Status and Challenges (Nato Asi Series, Series F : Computer and Systems Sciences, Vol 49) but doesn't forget the main place, giving the reader the hottest as well as based confirm resource info that maybe you can be considered one of it. This great information could drawn you into brand-new stage of crucial contemplating.
