## **Radical Nature: Rediscovering the Soul of Matter** Christian de Quincey

This groundbreaking book proposes that the universe around us is literally alive and conscious. This worldview restores a sense of the sacred to modern lives that have too long insisted that mind, spirit, and consciousness must be divorced from body, nature, and matter. Going back to the earliest days of Western philosophy, this book illustrates how the notion of intrinsically sentient matter is thousands of years old and has only recently been challenged by the currently dominant paradigm of materialism. By recognizing that matter feels, one can more closely relate to our bodies, planet, and cosmic environment as magnificent creations brimming with spirit and meaning.
