Conservation and Biodiversity (Scientific American Library)

Andrew P. Dobson

Conservation and Biodiversity (Scientific American Library) Andrew P. Dobson

This work provides an overview of the scientific issues involved in preserving the variety of ecosystems on the planet. Beginning with a discussion of the scientific and economic principles relevant to the conservation of biodiversity, the text explores the causes of extinction and consequences of habitat loss. It also includes endangered species management, the conservation of biological communities and the practical possibilities for sustainable use of the environment.
