This multimedia CD-ROM combines real-time video of an actual patient exam with diagrams that highlights proper procedures for auscultating breath sounds. The outstanding audio sections allow users to hear a variety of normal and adventitious breath sounds, and provide detailed explanations about each type. Step-by-step, the user learns and experiences principles of chest examination, bilateral chest exam, identification of lung lobes, and identification of breath sounds. The program also includes a self-assessment examination, with answers and detailed feedback for each response. Contact Hours: 1
