**Metaprogramming Elixir: Write Less Code, Get More Done (and Have Fun!)** Chris McCord

Write code that writes code with Elixir macros. Macros make metaprogramming possible and define the language itself. In this book, you'll learn how to use macros to extend the language with fast, maintainable code and share functionality in ways you never thought possible. You'll discover how to extend Elixir with your own first-class features, optimize performance, and create domain-specific languages.

Metaprogramming is one of Elixir's greatest features. Maybe you've played with the basics or written a few macros. Now you want to take it to the next level. This book is a guided series of metaprogramming tutorials that take you step by step to metaprogramming mastery. You'll extend Elixir with powerful features and write faster, more maintainable programs in ways unmatched by other languages.

You'll start with the basics of Elixir's metaprogramming system and find out how macros interact with Elixir's abstract format. Then you'll extend Elixir with your own first-class features, write a testing framework, and discover how Elixir treats source code as building blocks, rather than rote lines of instructions. You'll continue your journey by using advanced code generation to create essential libraries in strikingly few lines of code. Finally, you'll create domain-specific languages and learn when and where to apply your skills effectively.

When you're done, you will have mastered metaprogramming, gained insights into Elixir's internals, and have the confidence to leverage macros to their full potential in your own projects.

### **From reader reviews:**

#### **Helen Palmer:**

Why don't make it to be your habit? Right now, try to prepare your time to do the important action, like looking for your favorite publication and reading a e-book. Beside you can solve your long lasting problem; you can add your knowledge by the publication entitled Metaprogramming Elixir: Write Less Code, Get More Done (and Have Fun!). Try to stumble through book Metaprogramming Elixir: Write Less Code, Get More Done (and Have Fun!) as your buddy. It means that it can to become your friend when you feel alone and beside associated with course make you smarter than in the past. Yeah, it is very fortunated in your case. The book makes you a lot more confidence because you can know anything by the book. So , let's make new experience as well as knowledge with this book.

#### **Shawn Hodgin:**

Information is provisions for those to get better life, information presently can get by anyone in everywhere. The information can be a knowledge or any news even restricted. What people must be consider whenever those information which is inside the former life are difficult to be find than now's taking seriously which one would work to believe or which one the resource are convinced. If you have the unstable resource then you buy it as your main information we will see huge disadvantage for you. All of those possibilities will not happen in you if you take Metaprogramming Elixir: Write Less Code, Get More Done (and Have Fun!) as the daily resource information.

#### **Jennifer Oaks:**

It is possible to spend your free time to learn this book this e-book. This Metaprogramming Elixir: Write Less Code, Get More Done (and Have Fun!) is simple bringing you can read it in the recreation area, in the beach, train and also soon. If you did not possess much space to bring typically the printed book, you can buy often the e-book. It is make you easier to read it. You can save typically the book in your smart phone. So there are a lot of benefits that you will get when you buy this book.

#### **Gerald Chisholm:**

As we know that book is very important thing to add our know-how for everything. By a e-book we can know everything we really wish for. A book is a group of written, printed, illustrated or maybe blank sheet. Every year seemed to be exactly added. This e-book Metaprogramming Elixir: Write Less Code, Get More Done (and Have Fun!) was filled regarding science. Spend your time to add your knowledge about your scientific disciplines competence. Some people has distinct feel when they reading any book. If you know how big good thing about a book, you can truly feel enjoy to read a guide. In the modern era like currently, many ways to get book that you wanted.
